ABOUT US

Elames Ironmongery division was established to bring to customers' ordinary and extraordinary hardware solutions. Let Elames "Open the Door" to an incredible range of reliable products, which are available with unique and patented designs, and functions just suited for that right client that wants and demand only highest quality products available within the industry.

Our strong history for the last 4 decades has enabled us to deal with top brands from Europe and all around the world. Our specialized sales Team has assisted many end users over the years in meeting specific requirements and implementing custom solutions. Our specialists are certified and well verse to dealing directly with customers not only in one of the largest showrooms in Bahrain but also on-site for a better understanding of clients requirements.

ELAMES is an associate member of **(GAI) Guild of Architectural Ironmongers** and offer a complete, free of charge, scheduling service. As a member of the GAI you can be assured our schedules/specifications are prepared to the latest British and European hardware standards, ensuring correct product specifications and applications to meet end user requirements.

Our service offers not just a detailed spreadsheet, quote and samples it provides the expertise, communication and commitment required to see this time consuming process through from start to finish. Our skilled technical team will work closely with the client, identify any potential problems and provide the appropriate solution.

The Construction Specifications Institute

The Construction Specifications Institute (CSI) is an organization that keeps and changes the standardization of construction language as it pertains to building specifications.

Elames has key staff that stays involved and active in this widely recognized organization.

Access Control Systems

Interior Decorative

(DHI) The Door and Hardware Institute is an association proudly serving door security and safety professionals, and the dynamic companies they represent, in the non-residential construction industry. Through education, advocacy, accreditation and facilitated networking, we provide members with the collective intelligence to meet the security and safety needs of their customers. Elames also has key staff with long term training and expertise with this Association.

Designer Handles

Crafted and finished by hand, our unique and stylish door handles range adds an unusual statement to domestic and commercial interior solutions. A vast range of unique styles and designs is available to meet various types of interior design requirements, dealing with award winning designers and manufacturers alike, built to the highest quality. We believe in offering a truly unique and unusual solutions to your interior environment, that's why we offer various finishes, materials and fixings for all of our stylish door handles. From bright polish and satin brushed finishes, through to aluminum and aged brass, copper and bronze materials, rest assured to find your ideal and unique door handle at Elames.

Levers

Choosing the right door lever for design and application can be one of the most important and difficult aspects in choosing your ironmongery. Elames appreciates the importance of this in choosing the right handle to suit your design, specification, and budget. Our wide range offerings of Stainless Steel, Brass, Bronze, and many other finishes is ideal for the majority of applications, suitable for use in contract, public, commercial, institutional, and residential buildings. Our Ironmongery Sales associates will give you an extremely large range of door Lever offerings from countries in Europe, Asia, and the United States of America.

Door Locks

We offer the widest variety of door locks, which are available with both EN/CE and ANSI/UL Certification from the many different manufactures we represent worldwide.

Types of Door Locks:

- Mortise Locks – available in both EN / ANSI Standards
- Bored Locks – available in ANSI / Standards
- Electrified Locks – available in both EN / ANSI Standards
- Push Button Locks – available in both EN / ANSI Standards
- Card Access Locks – available in both EN / ANSI Standards

Cylinders

Most of us really value and appreciate our homes. Not only are they the place we unwind, relax and spend quality time with our families, they are usually our biggest investment and expenditure, and so naturally we make an effort to look after them. That's where Cylinders form an important role in-house/door security.

Depending on customers' requirements, all key systems available through Elames can be based on either a simple master keyed System or we can also offer a more protective High-Security System. We can assist you in establishing your own Great Grand Master Keyed, Grand Master Keyed, or Master Keyed system suited for your specific security needs. All systems can be provided in European CE/EN and North American ANSI, UL standards.

Hinge

No matter what you're looking for, we got you covered through a vast offering of Hinges that is guaranteed to meet your door requirements, fire rating, and durability and most importantly aesthetically pleasing.

Here are just some of the different hinge offerings Elames can offer:

- Two Knuckle Lift-Off Type Hinge
- Three Knuckle Plain and Ball Bearing Type in Standard weight hinge gauge.
- Five Knuckle Plain and Ball Bearing Type in Standard and Heavyweight Hinge gauge
- Olive Knuckle Hinge for your very ornate design look
- Paumelle Hinge also for your very ornate design look
- Pivots – top, bottom, intermediate

All hinges are available in BS/EN (European Standards) and UL/BHMA (Underwriters Laboratories),

Exit Devices

Exit Devices are required for both Panic and Security from January 1, 2010. Therefore it became mandatory for all exit devices to comply with the latest revisions of both the EN 1125 or EN 1179 and CE Marking.

Panic Application - Conforming to EN 1125:2008

A "Panic" application is where the exit door is used by members of the public and must provide "safe and effective escape through the doorway with minimum effort and without prior knowledge of operation".

Emergency Applications - Conforming to EN 179:2008

An "Emergency" application is where the exit door is in a low occupancy environment and will only be used by trained personnel, such as in a place of work.

In addition to CE marking applications in Europe, Exit Devices are also to be tested to comply to ANSI Standard A156.3 which is developed and maintained by BHMA in North America.

Elames is happy to provide Exit Devices for either Certifications as we have sources from vast Manufactures world-wide that offer as such.

Door Closers

Door Closers also are required to clearly Certified by the following:

British Standard - EN1154, EN1155, CE - Certifire
ANSI Standard - ANSI STANDARD A156.4 and UL LISTED.

Elames can provide closers for any and all unique application, fire ratings, and door types.

Here are just a few of the types of Door Closers:

- Surface Closer
- Concealed Closer
- Track Closer
- Floor Closer
- Overhead Concealed Closer
- Automatic Door Closer

Access Control Systems

With an access control system, you can now replace keys in your day-to-day activities, control access to various spaces and set different security Levels in different areas. Another big advantage of installing an access control system is user's management and authorization. Elames Access Control Team is ready and equipped to assist you in selecting the best system suitable for your specific requirements and/or for your existing software system to ensure system compatibility and effectiveness.

Interior Decoration

At Elames, we understand interior design needs and therefore collaborating with award winning designers that have proved their uniqueness and creativity in architecture. Stylish handrails, coat hooks, furniture and many more customizable options available for those who believe that utility and style can go hand in hand.

Elames decorative ironmongery solutions offers unique and expertly crafted array of products suited to both commercial and domestic interior settings. All products are expertly crafted to the highest quality standards.

Regardless of your project requirements, we are prepared to assist you in creating a masterpiece!

BRANDS

Reese Enterprises is a family owned business that has been designing and manufacturing door and floor products for more than 80 years. The company began as a "roll former" of zinc and copper weatherstrip materials. Over time, door and window weatherstrips changed, and extruded aluminum shapes with vinyl, neoprene or polyprene inserts replaced the roll formed materials.

In 1971, d line's first lever, the U-shape, Ø14 mm, was manufactured. It was followed by the L-shape, which firmly established the d line ethos of stalwart, minimalist design. The overriding characteristic of these first two levers has been maintained in d line products ever since: the bent sections on all metal tubes maintain the radius of the even sections. This ensures a well balanced visual impression.

Over the years more designs emerged from the hands of Knud Holscher and slowly, but consistently the product range formed a complete scheme of stainless steel designs.
